**Submitted to:** Sir Aqib Rehman

## 1. **Project Title:** My dressing organizer

## 2. **Selected key features:**

- **User Wardrobe Management:**

1. Add New Clothing Items: Users can add clothes with detailed attributes such as color, type (e.g., shirt, pants, blazer), and category (e.g., wedding dress, party dress, casual).
2. Image Upload: Users can upload images of their clothing items for easy identification.
3. Last Worn Tracking: The app should keep track of when each clothing item was last used.

- **Outfit Combinations and Suggestions:**

1. Customizable Combinations: Allows users to manually save and edit their own combinations.
2. Outfit Ratings and Feedback: Users can rate combinations and leave notes for future reference.

- **Smart Notifications and Reminders:**

1. Unused Clothing Alerts: Notify users when a particular item hasn't been worn for a certain period.
2. Event-Based Suggestions: Suggests outfit ideas based on upcoming events (e.g., weddings, parties).

- **Trend Integration:**

1. Daily Dressing Trends: Displays fashion trends, tips, and inspiration to help users stay updated.
2. Seasonal Recommendations: Suggests seasonal outfits (e.g., summer, winter) and appropriate combinations.

- **Analytics and Insights:**

1. Combination History: Displays past outfit pairings and user ratings.

- **User Experience Features:**

1. Search and Filter: Easily search for items based on color, type, or last worn date.
2. Tagging System: Tag clothing items for quicker organization and retrieval.
3. Favorites: Mark preferred clothing items and combinations for easy access.

- **Customization Options:**

1. o Personal Styling Preferences: Users can input their style preferences (e.g., classic, modern) to tailor outfit suggestions.
2. Custom Labels and Categories: Add personalized labels for better organization (e.g., "Work", "Casual Fridays").
